Shape and Space. The following worksheets, flashcards and other educational resources have been created to help develop an understanding of shape and space.

Shape and Space - Free Worksheets and Resources

A shape is the form of an object or its external boundary, outline, or external surface, as opposed to other properties such as color, texture or material composition.

Shape - Wikipedia

Horizontal lines suggest a feeling of rest or repose because objects parallel to the earth are at rest. In this landscape, horizontal lines also help give a sense of space. The lines delineate sections of the landscape, which recede into space.

Understanding Formal Analysis - The Getty

The curvature is a quantity describing how the geometry of a space differs locally from the one of the flat space. The curvature of any locally isotropic space (and hence of a locally isotropic universe) falls into one of the three following cases: . Zero curvature (flat); a drawn triangle's angles add up to 180° and the Pythagorean theorem holds; such 3-dimensional space is locally modeled by ...
